Using Technology to Raise Standards

CPD

with Mr P & Dr Chips In Winchester

Creative Purposeful Learning

A whole school approach to Computing

Mr P and Dr Chips are bringing their highly-rated and inspiring ultimate computing training day to Winchester in November.

The session will be packed full of ideas for how to effectively embed the computing curriculum throughout a primary school. With practical hands on sessions, teachers will leave with a better understanding of how to implement the computing curriculum with practical ideas to use in class.

Mr P has been a classroom teacher for over 14 years and still works part time in school. He is also now an ADE and works internationally with schools looking to embed technology to transform learning. Dr Chips is a primary teacher in Manchester and was one of the authors of the DfE funded Barefoot Computing project.

**Monday 13th
November 2023
9.00-3.30pm**

Venue:

**Holiday Inn
Telegraph Way,
Winchester
SO21 1HZ**

Costs:

£185 per person
(inc lunch and crumbles)
plus VAT

Please email:

claire@MrPICT.com

to book a place.

CPD with Mr P and Dr Chips

Creative Purposeful Learning

Programme

SESSION ONE 9.15am - 10.45am

The Computing Curriculum

In this first session, both Lee and Jon will explore the computing curriculum and how best to implement it. Lee will then explore where technology fits in today's classroom and explore the importance of digital literacy to ensure pupils become positive and safe digital citizens.

SESSION TWO 11am - 12.15pm

All Things Programming

Dr Chips will lead this session exploring computer science including computational thinking and physical computing to inspire students with their learning. Delegates will have a better understanding of computer science, how to implement it and improve their own knowledge of the subject. Teachers will learn how to use their crumbles robotics kit to further enhance computing in the classroom.

SESSION THREE 1pm - 2.15pm

Mini Computing Project

Building on the previous session, delegates are then given the opportunity to take part in a purposeful project to further build their confidence and knowledge with physical computing through the crumbles robotics kit. Applying everything we have covered, delegates will showcase their projects in a meaningful way.

SESSION FOUR 2.30pm - 3.30pm

Apps to bring the curriculum to life

Mr P will continue to demonstrate a range of apps and tools to enhance the curriculum sharing real life examples. Teachers will have time to explore, tinker and build their own knowledge and confidence so they can hit the ground running as soon as they get back to class.

"It's been brilliant having Mr P in our school - not only is he full of fantastic ideas for how to use tech to enhance teaching and learning/ a mine of useful information on apps to use (alone and in conjunction with others)/ conversant with all ofsted reports and practices and far more besides, he is also very entertaining and made the day fun!"

"Just had a fantastic day of training. I left feeling inspired and motivated. A superb day filled with ideas that I cannot wait to try out in the classroom. Today wasn't just about ICT, it was identifying the ways in which we can make a massive difference to children with creative ways to inspire, motivate and make education engaging for all."

"Wow! What a fantastic day of training. Full of practical ideas to take back and use immediately to both inspire learning and reduce workload. The real compliment is that after we had finished I actually went back to school, rather than straight home, to share some of the ideas."
